# Invitation to the Construction Engineering Masters Dissertation Conference

---

Please join us to hear from the 6th cohort of the Construction Engineering Masters (CEM) Programme. This is a great opportunity to meet with and listen to the emerging leaders of the construction sector. Each student will present findings from their dissertation research and there will be time for questions and networking. CEM dissertations cover a wide range of topics and students have used a variety of research methods to explore issues that they have identified in the industry. This year's dissertation topics include building information modeling, leadership in virtual teams, embodied carbon, design for manufacture and assembly, water management, productivity, procurement, finance, automation of design, quality control, innovation, insights from big data and change management. These topics, amongst others, will provide the basis for an insightful and thought-provoking event.

**Friday 14th September 2018**  
Robinson College, Cambridge

---

Please RSVP by 1st September to: **[cem.admin@construction.cam.ac.uk](mailto:cem.admin@construction.cam.ac.uk)**

The Construction Engineering Masters (CEM) degree programme is run by the Laing O'Rourke Centre for Construction Engineering and Technology in the Cambridge University Engineering department in partnership with the Cambridge Judge Business School.

The CEM programme was launched in 2011 with industry partner Laing O'Rourke to fulfil a shared vision of transforming the construction industry through innovation, education and technology.
